Questions Submitted:

1. Per question #6B (Describe the software's ability to provide customized reports directly to students), could you please provide more information about what specific functionality you are looking for with regard to student reports? Are you looking for summaries or notes from student appointments?

Yes, this would include summary/notes from student appointments; however, we are also interested in providing students with clear and directive communication regarding (1) instructor concerns where appropriate, (2) special population assistance opportunities, (3) the ability to schedule appointments via a link within the email, text, Facebook post, etc., and (4) the ability to pull information regarding appointments the student has had with support services at the school.

As well, the ability for students to know their identified cohorts (or success network) they are a part of (i.e. athlete, project success, disability services, etc.), which supports their capacity to follow up as appropriate and necessary. Report information that ultimately informs students and supports the college's administrative effort to "close the loop" and clarify expectations with students is of interest.
