2.03.00 INTERNSHIPS

Joliet Junior College (JJC) desires to prepare students with applicable, relevant, job knowledge and career exploration to help enrich their educational experience and to assure the community College system of continued availability of well-trained personnel to staff the community College system. As such, the College will explore opportunities to cooperate with other institutions and local organizations to offer internships designed to bridge classroom instruction with real world experience. The College expects an internship opportunity to provide meaningful training and experience to those individuals who are mutually assigned to JJC or through partnerships via bona fide internship programs.
