

### Student-Faculty Interaction

The more contact students have with their teachers, the more likely they are to learn effectively and to persist toward achievement of their educational goals. Personal interaction with faculty members strengthens students' connections to the college and helps them focus on their academic progress. Working with an instructor on a project or serving with faculty members on a college committee lets students see first-hand how experts identify and solve practical problems. Through such interactions, faculty members become role models, mentors, and guides for continuous, lifelong learning. The six items used in this benchmark are about students' experience in these areas:

*During the current school year, how often have students*

- Used email to communicate with an instructor
- Discussed grades or assignments with an instructor
- Talked about career plans with an instructor or advisor
- Discussed ideas from readings or classes with instructors outside of class
- Received prompt feedback (written or oral) from instructors on performance
- Worked with instructors on activities other than coursework
