VI. SCOPE OF WORK

Branding/Perception RFP

Joliet Junior College has identified elevating the perception of the college as a focus in its current strategic plan. To address this goal, the college seeks to engage consulting services to assist in a brand perception study.

The college seeks a market research firm to conduct surveys to gather community perceptions and opinions of Joliet Junior College through quantitative and qualitative data, allowing the college to benchmark its brand awareness and efficacy among stakeholders and audiences. The analysis of this data should measure effectiveness of the brand messaging driving enrollment, opinion of the College as a higher education institution compared to other institutions, and support for public funding of the College. Ultimately, the college seeks to identify opportunities to better engage with the community and prospective students.

In 2020, the college received a communications and marketing collateral audit which resulted in a five-point action plan to increase diversity, accessibility, and consistency in our outreach.

An updated style guide was also developed in 2021. The JJC brand has been a part of the community it serves for more than 100 years. As the nation’s first community college, JJC is rich in its tradition and effective in its mission of transforming lives through education. As trends shift and education priorities change over the years, serving the needs of its community continues to be the main focus of the institution.

With more than 1,500 employees, 180 degree and certificate programs and its 12,000+ students, a unified and consistent approach to JJC’s brand and image is critical to the college’s success. Keeping the JJC brand consistent is the main priority of this branding and style guide. The style guide covers well-known creative elements like logos, colors and fonts to assure their appropriate use, and also includes sections that cover newer brand elements such as social media, readability levels and the use of images.

Scope of Work:

The College seeks to benchmark its brand awareness among our stakeholders and audiences. The analysis of this data should measure effectiveness of the brand messaging driving enrollment, opinion of the College as a higher education institution compared to other institutions, and support for public funding of the College. Additionally, the College seeks to understand how our messaging about educational excellence, social

JOLIET JUNIOR COLLEGE

1901

justice, and community impact is perceived and resonates with stakeholders and audiences. The study should measure perceptions about top-level messaging that may be used in marketing, public speaking, community engagement, government affairs, student experiences, donor experiences, and other touchpoints. Message testing should be part of the design. The analysis should look at the effectiveness of how the College communicates about its attributes and the audience perception of related benefits. This benchmark study should inform the College about its strategic planning, leadership messaging, recruitment marketing, community relations, donor relations, and communications with key audiences. The survey design should ensure that the findings and analysis are as actionable by the College as much as possible.

Project Objectives

The primary objective of this project is to understand the public's current perception of the JJC brand. What is the unique value that JJC brings to our students and stakeholders? What does the public see as our face, personality, and spirit of JJC? Understanding this information will help us develop and implement an integrated marketing plan for the institution. In order to do so, we need to:

- Understand how JJC is perceived by our key audiences which include but are not limited to: high school students and parents, working adults, our district Hispanic population, & African American population and local employers.
- How the public perception has changed.
- How JJC wants to be perceived, and how that matches what is found in the marketplace.
- Distinguish clearly and concisely what's different/unique about JJC.

Project Requirements

- At a minimum, the research would need to answer the following key questions:
 - What level of brand awareness does JJC have in the marketplace?
 - What motivates students to inquire/apply to JJC?
 - What is the perception of JJC compared with its competitors?
 - What causes students to select other institutions over JJC?
 - What distinguishes JJC in the marketplace?
 - What is the level of brand recognition with our current advertising campaign?
 - What is the reaction to current marketing efforts (i.e. Where You Belong)?
 - What is the level of brand recognition with our competition's advertising campaigns?

- The deliverables below describe the minimum expectations from the awarded vendor. Please describe the approach your organization will take for each element.
 - Engaging with College leadership, including onsite meetings, to refine the understanding of study objectives and collaborate on survey design.
